Great for little ones learning to read, but some assembly required!

By SamWhat Am

This was bought for a five year old who will be starting kindergarten in the fall. She knows her letters and most letter sounds, but we wanted to give her some additional solid practice with rhyming words, word families and some sight words.

Ideally you should have access to a double sided printer before using this, but it is not absolutely required. Instructions for printing and assembling the books (very MINI BOOKS !) are somewhat confusing at first, but they do make cute little book(lets). I would suggest encouraging the child to color each page before assembly. The pages are perforated and numbered.

There is a picture to go with each new word, but make sure the child has a good understanding of the initial letter sound before guessing the word. An example is : a picture of a boy...but the word is Jack. Jack ended up with a pack...a pack on his back...that said quack (shows a picture of a duck inside the pack).

Another book had a duck in a truck with a buck that got stuck...so these are not words that a child can easily guess at, without a little guidance and knowledge of letter sounds. But most children will easily catch on and will enjoy the rhyming. The sight words are some of the basic ones like in, the, a, with, etc.

I would recommend this to anyone who loves the look on their child's face when they "get it" and enjoys working with them. The mini books are not really designed for a permanent spot on the bookshelf any more than your basic coloring book, but will help the child in building their word recognition.

Only rating it 4 stars because of the assembly and lack of durability, otherwise it is a really good set. Price may be a little high for what you actually get. I like it, don't love it and probably wouldn't purchase again, to be perfectly honest.

No disclosure needed - I am a "reviewer" of Amazon products and often get things at a discount, however this item I have bought at FULL price for my own personal use. Thank you for reading my review!

Great for intervention and summer practice at home

By Natalie Schmidt

I purchased this book to use at home with my son over the summer to review and work on skills learned in school this previous year. I really like how the book is laid out. The introduction to the book explains how to make the books, how to use them, and even other activities to extend the learning so parents who don't have an educational background can help their student. Each mini book is the front and back of one page and can either be copied for use later or torn out easily with the tear out pages and then used. Each mini book has pictures where the student can use the word family to make a new word for better understanding. After the word work then the student can see the word in print in The mini story.

As you can see in my picture, the books are not in color like the cover photo suggests. My son however enjoyed coloring the pictures while we talked about the story and it kept him actively engaged.

very easy readers

By DD67

Each of the little books not only uses a different word family, but also offers one or two new sight words. These are very short little books, great for the beginner reader that gets discouraged easily.

A snake

A snake wants to bake

A snake wants to bake a big cake

A snake wants to bake a big cake on a lake.

The last page offers the child a chance to fill in the first letter of the "ake" words.

The "eep" book goes like this

The Sheep

The sheep drove the jeep

The sheep drove the jeep and went beep

The sheep drove the jeep and went beep in his sleep.

Well you get the idea.
