am I glad I got THIS one

By aficionado guy

Wow! There is another higher profile, and much more expensive Bonestell book on Amazon which I was considering buying. But boy, am I glad I got THIS one! Don't get me wrong, I'm sure the more recent Bonestell book is very good and perhaps larger in size...and if you're willing to part with \$150 + bucks you'll probably see the higher quality.

But having bought this, what could I REALLY be missing? It was \$35 bucks. The printing is excellent. There is what seems to be an extremely comprehensive sampling of his works, from his early architectural career to movie matte paintings to his famous Collier's stuff and rarely seen fantasy castle & unicorn type paintings. I feel like this book covers his career thoroughly, and almost every painting is in color, as opposed to the "Conquest of Space" book which unfortunately printed a lot in B&W. What a great value for my \$35! Excellent.

Excellent representation of Bonstell's art

By R. hickman

Chesley Bonestell was a talented artist. He produced important work for Colliers, Look and all the 1950's magazines, when the space race was just getting started. His illustrations of space stations, rockets and other planets inspired the early part of the space age and gave young people like myself something to dream about. This book shows some, but by no means all of his work relating to early speculation about flight to other worlds. If you're a Bonestell fan or just like to see excellent artwork, Worlds Beyond is a good place to start. If you like this sort of thing, buy this book, it's by the Master of scientific illustration. There's nobody better. I only give it four stars, because the book needs to include more.
